This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights:

- Simulation of high Rayleigh number natural convection.
- Two-component simulation of nanofluids in natural convection.
- Including nanoparticle size effect on the Nusselt number.
- Studying the effect of boundary conditions on the nanoparticle.
