Numerical and experimental study of flow over stages of an offset merger dune interaction

C. Wang, Z. Tang, N. Bristow, G. Blois, K.T. Christensen, W. Anderson

PII: S0045-7930(16)30355-3
DOI: [10.1016/j.compfluid.2016.11.005](https://doi.org/10.1016/j.compfluid.2016.11.005)
Reference: CAF 3326

To appear in: *Computers and Fluids*

Received date: 20 July 2016
Revised date: 19 October 2016
Accepted date: 10 November 2016

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- Demonstration of wake veering in roughness sublayer of turbulent flow over sand dunes
- Demonstrated close agreement between numerical and matching experiment case
- First- and second-order statistics show channeling between streamwise-staggered dunes
