Benchmark numerical simulations of rarefied non-reacting gas flows using an open-source DSMC code

Rodrigo C. Palharini, Craig White, Thomas J. Scanlon, Richard E. Brown, Matthew K. Borg, Jason M. Reese

PII: S0045-7930(15)00255-8
DOI: [10.1016/j.compfluid.2015.07.021](https://doi.org/10.1016/j.compfluid.2015.07.021)
Reference: CAF 2959

To appear in: *Computers and Fluids*

Received date: 19 January 2015
Revised date: 10 July 2015
Accepted date: 23 July 2015

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- The *dsmcFoam* code was carefully verified and validated.
- Rarefied gas flows simulations were performed for simple and complex geometries.
- For all the cases investigated, *dsmcFoam* demonstrated very good agreement with numerical and experimental data.
