Control system design of flying-wing UAV based on nonlinear methodology

JiGuang Li, Xin Chen, Yajuan Li, Rong Zhang

PII: S2214-9147(16)30139-8

DOI: [10.1016/j.dt.2017.06.003](https://doi.org/10.1016/j.dt.2017.06.003)

Reference: DT 262

To appear in: *Defence Technology*

Received Date: 29 November 2016

Revised Date: 31 May 2017

Accepted Date: 14 June 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

LI Jiguang, Doctor, Nanjing University of Aeronautics &Astronautics,
Nanjing, China, 210016 for first author.

CHEN Xin. Researcher, Nanjing University of Aeronautics &Astronautics,
Nanjing, China, 210016 for second author.

LI Yajuan. Doctor, NanJing XiaoZhuang University, Nanjing, China, 211171 for third
author.

WANG Xin. Doctor, Nanjing University of Aeronautics &Astronautics,
Nanjing, China, 210016 for fourth author.

ZHANG Rong. Master, Nanjing University of Aeronautics &Astronautics,
Nanjing, China, 210016 for fifth author.
