

## Accepted Manuscript

A review on the wear of oil drill bits (conventional and the state of the art approaches for wear reduction and quantification)

Rafid Abbas

PII: S1350-6307(17)30800-2  
DOI: [doi:10.1016/j.engfailanal.2018.03.026](https://doi.org/10.1016/j.engfailanal.2018.03.026)  
Reference: EFA 3420  
To appear in: *Engineering Failure Analysis*  
Received date: 6 July 2017  
Revised date: 14 March 2018  
Accepted date: 15 March 2018

Please cite this article as: Rafid Abbas , A review on the wear of oil drill bits (conventional and the state of the art approaches for wear reduction and quantification). The address for the corresponding author was captured as affiliation for all authors. Please check if appropriate. Efa(2018), doi:[10.1016/j.engfailanal.2018.03.026](https://doi.org/10.1016/j.engfailanal.2018.03.026)

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**A Review on the Wear of Oil Drill Bits**

(Conventional and the State of the Art Approaches for Wear Reduction  
and Quantification)
