Investigation on mode-I crack propagation in concrete using bond-based peridynamics with a new damage model

Dong Yang, Wei Dong, Xuefeng Liu, Shenghui Yi, Xiaoqiao He

PII: S0013-7944(18)30321-7
DOI: <https://doi.org/10.1016/j.engfracmech.2018.06.019>
Reference: EFM 6041

To appear in: *Engineering Fracture Mechanics*

Received Date: 24 March 2018
Revised Date: 18 April 2018
Accepted Date: 13 June 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Investigation on mode-I crack propagation in concrete using bond-based peridynamics with a new damage model

Dong Yang¹, Wei Dong², Xuefeng Liu³, Shenghui Yi⁴, Xiaoqiao He^{5,*}

¹Research Assistant, Department of Architecture and Civil Engineering, City University of Hong Kong, Tae Chee Avenue, Kowloon, Hong Kong, China & Centre for Advanced Structural Materials, City University of Hong Kong Shenzhen Research Institute, 8 Yuexing 1st Road, Shenzhen Hi-Tech Industrial Park, Nanshan District, Shenzhen, China. E-mail: dongya2222-x@my.cityu.edu.hk

²Associate Professor, State Key Laboratory of Coastal and Offshore Engineering, Dalian University of Technology, Dalian 116024, P. R. China. E-mail: dongwei@dlut.edu.cn

³Ph.D Candidates, Department of Architecture and Civil Engineering, City University of Hong Kong, Tae Chee Avenue, Kowloon, Hong Kong, China. E-mail: xfliu6-c@my.cityu.edu.hk

⁴Research Fellow, Department of Architecture and Civil Engineering, City University of Hong Kong, Tae Chee Avenue, Kowloon, Hong Kong, China & Centre for Advanced Structural Materials, City University of Hong Kong Shenzhen Research Institute, 8 Yuexing 1st Road, Shenzhen Hi-Tech Industrial Park, Nanshan District, Shenzhen, China. E-mail: shenghyi2-c@my.cityu.edu.hk

⁵Professor, Department of Architecture and Civil Engineering, City University of Hong Kong, Tae Chee Avenue, Kowloon, Hong Kong, China & Centre for Advanced Structural Materials, City University of Hong Kong Shenzhen Research Institute, 8 Yuexing 1st Road, Shenzhen Hi-Tech Industrial Park, Nanshan District, Shenzhen, China.
