

Accepted Manuscript

Investigation and identification of fracture types of structural materials by means of acoustic emission analysis

Olena Stankevych, Valentyn Skalsky

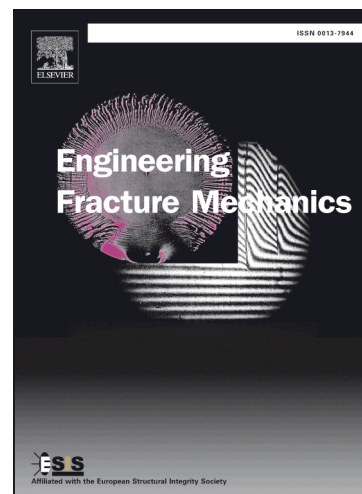

PII: S0013-7944(16)30303-4
DOI: <http://dx.doi.org/10.1016/j.engfracmech.2016.08.005>
Reference: EFM 5249

To appear in: *Engineering Fracture Mechanics*

Received Date: 7 March 2016
Revised Date: 30 July 2016
Accepted Date: 1 August 2016

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Investigation and identification of fracture types of structural materials by means
of acoustic emission analysis

Olena Stankevych¹, Valentyn Skalsky²

Department of acoustic methods of technical diagnostics, Karpenko Physico-
Mechanical Institute of National Academy of Sciences of Ukraine, 5 Naukova Str.,
Lviv, 79060, Ukraine
