Nonlinear elasticity of monolayer hexagonal crystals: Theory and application to circular bulge test

M.R. Delfani

PII: S0997-7538(16)30459-4

DOI: [10.1016/j.euromechsol.2017.09.012](https://doi.org/10.1016/j.euromechsol.2017.09.012)

Reference: EJMSOL 3497

To appear in: *European Journal of Mechanics / A Solids*

Received Date: 30 November 2016

Revised Date: 26 September 2017

Accepted Date: 26 September 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Nonlinear elasticity of monolayer hexagonal crystals: theory and application to circular bulge test
