

Author's Accepted Manuscript

About the influence of a water-based priming system on the interactions between wood and one-component polyurethane adhesive studied by atomic force microscopy and confocal Raman spectroscopy imaging

Kirstin Casdorff, Oliver Kläusler, Joseph Gabriel, Carlos Amen, Christian Lehringer, Ingo Burgert, Tobias Keplinger

PII: S0143-7496(17)30176-8
DOI: <https://doi.org/10.1016/j.ijadhadh.2017.10.001>
Reference: JAAD2067

To appear in: *International Journal of Adhesion and Adhesives*

Received date: 14 March 2017
Accepted date: 26 September 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting galley proof before it is published in its final citable form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

About the influence of a water-based priming system on the interactions between wood and one-component polyurethane adhesive studied by atomic force microscopy and confocal Raman spectroscopy imaging
