Influence of fiber type on the impact response of titanium-based fiber-metal laminates

Xin Li , Xin Zhang , Yangbo Guo , V.P.W Shim , Jinglei Yang ,
Gin Boay Chai

PII: S0734-743X(17)30448-7
DOI: [10.1016/j.ijimpeng.2017.12.011](https://doi.org/10.1016/j.ijimpeng.2017.12.011)
Reference: IE 3041

To appear in: *International Journal of Impact Engineering*

Received date: 23 May 2017
Revised date: 15 October 2017
Accepted date: 14 December 2017

nates, *International Journal of Impact Engineering* (2017), doi: [10.1016/j.ijimpeng.2017.12.011](https://doi.org/10.1016/j.ijimpeng.2017.12.011)

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlight

- Ballistic performance of titanium based FMLs were examined
- Influence of fiber type on the impact response of FMLs were investigated
- Ballistic performance of Ti/HB50 system is superior to Ti/CFRP combination
