Lateral Impact Response of Innovative Hollow Corrugated Members

Mohammad Nassirnia , Amin Heidarpour , Xiao-Ling Zhao ,
Rui Wang , Wei Li , Lin-Hai Han

PII: S0734-743X(16)31042-9
DOI: [10.1016/j.ijimpeng.2017.12.010](https://doi.org/10.1016/j.ijimpeng.2017.12.010)
Reference: IE 3040

To appear in: *International Journal of Impact Engineering*

Received date: 15 December 2016
Revised date: 20 October 2017
Accepted date: 14 December 2017

Please cite this article as: Mohammad Nassirnia , Amin Heidarpour , Xiao-Ling Zhao , Rui Wang , Wei Li , Lin-Hai Han , Lateral Impact Response of Innovative Hollow Corrugated Members, *International Journal of Impact Engineering* (2017), doi: [10.1016/j.ijimpeng.2017.12.010](https://doi.org/10.1016/j.ijimpeng.2017.12.010)

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- Dynamic behaviour of Corrugated Members was investigated through experiments
- A validated 3D nonlinear finite element model for Corrugated Members was proposed
- Corrugation geometry parameters effect on lateral impact behaviour was studied
- The performance of Corrugated Members was demonstrated compared to built-up SHS
