Accepted Manuscript

Influence of Global Stiffness and Equivalent Model on Prediction of Impact Response of RC Beams

Thong M. Pham , HongHao

PII: S0734-743X(17)30428-1
DOI: 10.1016/j.ijimpeng.2017.11.014
Reference: IE 3023

To appear in: *International Journal of Impact Engineering*

Received date: 15 May 2017
Revised date: 24 November 2017
Accepted date: 24 November 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

ACCEPTED MANUSCRIPT

HIGHLIGHTS

- Analytical model for prediction of impact response
- Global stiffness does not affect the impact force
- Roles of local and global stiffness in the impact response at difference phases
