Investigation on the non-coaxiality in the drilling of carbon-fibre-reinforced plastic and aluminium stacks

Xiong Liang, Dan Wu, Yuhao Gao, Ken Chen

PII: S0890-6955(17)30155-4

DOI: [10.1016/j.ijmachtools.2017.11.001](https://doi.org/10.1016/j.ijmachtools.2017.11.001)

Reference: MTM 3301

To appear in: *International Journal of Machine Tools and Manufacture*

Received Date: 5 July 2017

Revised Date: 27 October 2017

Accepted Date: 2 November 2017

Please cite this article as: X. Liang, D. Wu, Y. Gao, K. Chen, Investigation on the non-coaxiality in the drilling of carbon-fibre-reinforced plastic and aluminium stacks, *International Journal of Machine Tools and Manufacture* (2017), doi: 10.1016/j.ijmachtools.2017.11.001.

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Investigation on the non-coaxiality in the drilling of carbon- fibre-reinforced plastic and aluminium stacks

Xiong Liang, Dan Wu*, Yuhao Gao, Ken Chen

State Key Laboratory of Tribology, Department of Mechanical Engineering,
Tsinghua University, Beijing 100084, China

Xiong Liang is currently a doctoral candidate in the Department of Mechanical Engineering, Tsinghua University, Beijing, China. He received the bachelor's degree and master's degree in material engineering from Northeastern University of China, in 2013 and 2015. His research interests focus on the drilling of carbon- fibre-reinforced plastic and aluminium stacks.

Dan Wu is currently a professor in the Department of Mechanical Engineering, Tsinghua University, Beijing, China and she is a member of American Society for Precision Engineering, and a senior member of the Chinese Mechanical Engineering Society. She received her bachelor's degree, master's degree and doctor's degree in mechanical engineering from Tsinghua University, in 1988, 1990 and 2008, respectively. Her research interests focus on precision and ultra-precision machining. She has authored/coauthored more than 140 research papers, five book chapters, and over 40 granted patents. She won the Science and Technology Progress Award from Ministry of Education of China and the Award of Beijing Higher Education Achievements.

Yuhao Gao received the bachelor's degree and doctor's degree in mechanical engineering and automation from Tsinghua University, Beijing, China, in 2012 and 2017, respectively. His research interests focus on the deformations analysis in stack drilling of large assemblies.

Ken Chen is currently a professor in the Department of Mechanical Engineering, Tsinghua University, Beijing, China. He received the B.S. degree in mechanical engineering from Sichuan University, Chengdu, China, in 1982, and the M.S. and Ph.D. degrees in mechanical engineering from Zhejiang University, Hangzhou, China, in 1984 and 1987, respectively. From 1991 to 1992, he was a Visiting Professor at the University of Illinois, Chicago. From 1992 to 1995, he was a Postdoctoral Researcher with Purdue University, Indianapolis. He has published more than 200 papers. His research interests include bionic-robots, special robots and robotic manufacturing. Prof. Chen is a member of the American Society of Mechanical Engineers, and a senior member of the Chinese Mechanical Engineering Society. He was the
