Acoustic emission in dressing of grinding wheels: AE intensity, dressing energy, and quantification of dressing sharpness and increase in diamond wear-flat size

Jeffrey Badger, Stuart Murphy, Garret E. O'Donnell

PII: S0890-6955(17)30161-X

DOI: [10.1016/j.ijmachtools.2017.11.007](https://doi.org/10.1016/j.ijmachtools.2017.11.007)

Reference: MTM 3307

To appear in: *International Journal of Machine Tools and Manufacture*

Received Date: 17 July 2017

Revised Date: 3 November 2017

Accepted Date: 8 November 2017

Please cite this article as: J. Badger, S. Murphy, G.E. This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Acoustic emission in dressing of grinding wheels: AE intensity, dressing energy, and
quantification of dressing sharpness and increase in diamond wear-flat size

Jeffrey A. Badger, Ph.D. is an expert in grinding. He works independently as “The Grinding Doc”, a consultant in grinding. He continues to do research in the field and has strong ties to Trinity College, Dublin, where he did his Ph.D. His is widely published in the academic journals and in CIRP. Contact: +1-512-934-1857 // JB@TheGrindingDoc.com.

Stuart Murphy received his Ph.D. from Trinity College Dublin in 2015. His research areas are in the field of grinding including eccentricity, loading, process monitoring via acoustic emission, force and power measurements. Contact: murphs12@tcd.ie.

Dr. Garret O'Donnell is a University lecturer in the Department of Mechanical and Manufacturing Engineering in Trinity College Dublin and an associate member of CIRP. Garret's research activity in Trinity College Dublin is based on advancing manufacturing technologies that underpin sectors such as biomedical, automotive, aerospace, and ICT. His principal research area is the process monitoring of machining processes with goals of understanding the fundamental science, developing new sensor concepts, signal processing algorithms, intelligent decision making strategies and adaptronic control systems for high performance cutting processes. Contact: odonnege@tcd.ie.
