

## Accepted Manuscript

An analysis of thermal autofrettage process with heat treatment

R. Shufen , U.S. Dixit

PII: S0020-7403(18)30202-9  
DOI: [10.1016/j.ijmecsci.2018.05.053](https://doi.org/10.1016/j.ijmecsci.2018.05.053)  
Reference: MS 4364

To appear in: *International Journal of Mechanical Sciences*

Received date: 19 January 2018  
Revised date: 25 May 2018  
Accepted date: 28 May 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Highlights**

- A thermal autofrettage coupled with heat treatment is proposed.
- FEM analysis is carried out.
- The proposed process generates compressive stresses at the walls of the cylinder.
- The proposed process will help to mitigate stress-corrosion-cracking and fatigue.
