Electro-mechanical vibration characteristics of functionally graded piezoelectric plates with general boundary conditions

Zhu Su , Guoyong Jin , Tiangui Ye

PII: S0020-7403(17)32658-9
DOI: [10.1016/j.ijmecsci.2018.01.040](https://doi.org/10.1016/j.ijmecsci.2018.01.040)
Reference: MS 4158

To appear in: *International Journal of Mechanical Sciences*

Received date: 20 September 2017
Revised date: 25 January 2018
Accepted date: 30 January 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- An exact solution for free and transient vibration analyses of FGPM plates is presented
- The proposed formulation can be applicable to arbitrary boundary conditions
- Convergence and efficiency of the current solution are validated
- Effects of various factors on dynamic behaviors of FGPM plates are discussed
