Thermal Nonequilibrium Porous Convection in a Heat Generating Medium

S. Saravanan, R.K. Brinda

PII: S0020-7403(17)31732-0
DOI: [10.1016/j.ijmecsci.2017.10.024](https://doi.org/10.1016/j.ijmecsci.2017.10.024)
Reference: MS 3990

To appear in: *International Journal of Mechanical Sciences*

Received date: 27 June 2017
Revised date: 10 October 2017
Accepted date: 15 October 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights:

- Thermal nonequilibrium effects on convection inside a porous cavity are addressed.
- Different thermal boundary conditions are considered for symmetrical passive cooling.
- Bifurcation is prone to appear as the system moves towards thermal equilibrium.
