Modular Approach to structural similitude

Cristiano P. Coutinho, António J. Baptista, José Dias Rodrigues

PII: S0020-7403(17)33126-0
DOI: 10.1016/j.ijmecsci.2017.11.005
Reference: MS 4021

To appear in: *International Journal of Mechanical Sciences*

Received date: 15 September 2016
Revised date: 1 May 2017
Accepted date: 3 November 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

ACCEPTED MANUSCRIPT

Highlights

- Limitations still persist applying similitude theory (ST) through current methods.
- The modular approach improves how ST is applied through the governing equations (GE).
- The ST is applied to complex structures through the GE of its simple substructures.
