A generalized model for thermoelastic damping in beams with mid-plane stretching nonlinearity

Dileesh V. Parayil, Salil S. Kulkarni, Dnyanesh N. Pawaskar

PII: S0020-7403(17)32182-3
DOI: [10.1016/j.ijmecsci.2017.12.009](https://doi.org/10.1016/j.ijmecsci.2017.12.009)
Reference: MS 4073

To appear in: *International Journal of Mechanical Sciences*

Received date: 8 August 2017
Revised date: 15 November 2017
Accepted date: 2 December 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- Presents a generalized model to capture thermoelastic damping in beams with mid-plane stretching nonlinearity
- Results obtained with this model are different from the ones presented in literature
- Reasons for deviation are systematically analyzed and explained
- Highlights the importances of correctly capturing the coupled nature of interactions between the thermal and displacement fields
