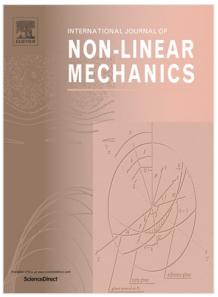
Accepted Manuscript



Comparing linear and nonlinear hydrodynamical models for charge transport in graphene based on the Maximum Entropy Principle

Liliana Luca, Vittorio Romano

PII: S0020-7462(17)30834-X
DOI: https://doi.org/10.1016/j.ijnonlinmec.2018.01.010
Reference: NLM 2967

To appear in: *International Journal of Non-Linear Mechanics*

Received date : 16 December 2017
Accepted date : 31 January 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
