Transmission of $\{332\}$ $\langle 113 \rangle$ twins across grain boundaries in a metastable β -titanium alloy

Fengxiang Lin, Matthieu Marteleur, Pascal J. Jacques, Laurent Delannay

PII: S0749-6419(17)30602-2

DOI: [10.1016/j.ijplas.2018.02.012](https://doi.org/10.1016/j.ijplas.2018.02.012)

Reference: INTPLA 2308

To appear in: *International Journal of Plasticity*

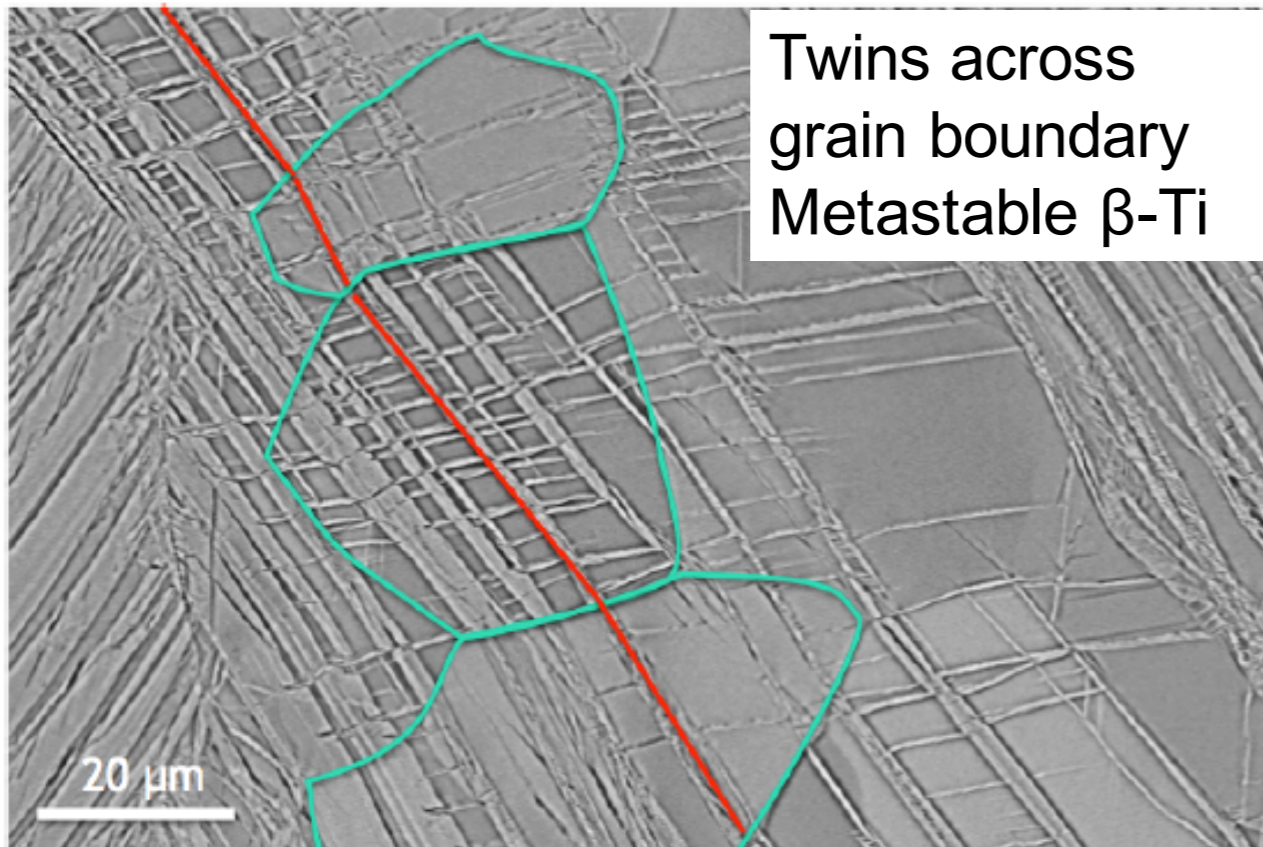

Received Date: 31 October 2017

Revised Date: 1 February 2018

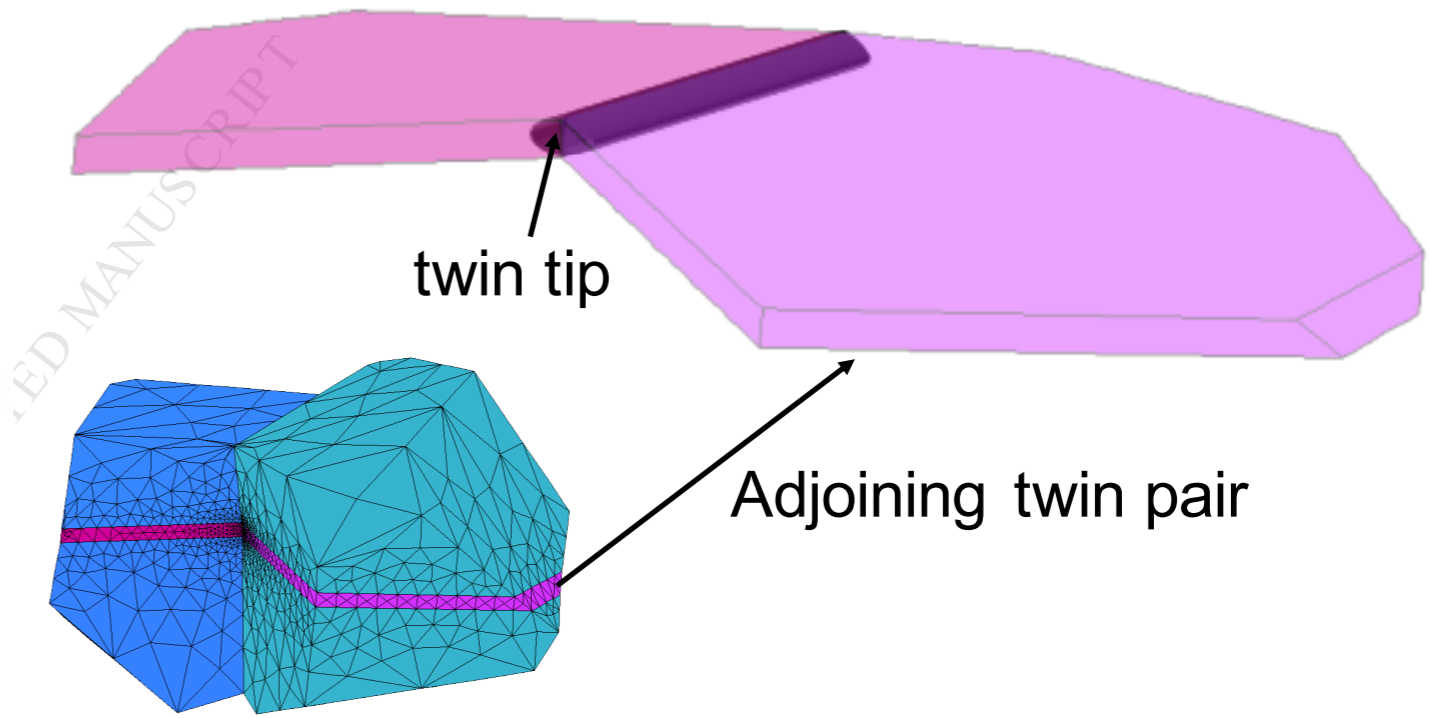

Accepted Date: 17 February 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

CPFEM simulation of twin transmission
