Continuous description of the atomic structure of grain boundaries using dislocation and generalized-disclination density fields

Xiao-Yu Sun, Vincent Taupin, Claude Fressengeas, Patrick Cordier

PII: S0749-6419(15)00169-2

DOI: [10.1016/j.ijplas.2015.10.003](https://doi.org/10.1016/j.ijplas.2015.10.003)

Reference: INTPLA 1975

To appear in: *International Journal of Plasticity*

Received Date: 14 July 2015

Revised Date: 30 September 2015

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Continuous description of the atomic structure of grain boundaries
using dislocation and generalized-disclination density fields**
