Plasticity driven growth of nanovoids and strength of aluminum at high rate tension:
molecular dynamics simulations and continuum modeling

V.S. Krasnikov, A.E. Mayer

PII: S0749-6419(15)00103-5

DOI: [10.1016/j.ijplas.2015.06.007](https://doi.org/10.1016/j.ijplas.2015.06.007)

Reference: INTPLA 1932

To appear in: *International Journal of Plasticity*

Received Date: 21 January 2015

Revised Date: 7 June 2015

Accepted Date: 13 June 2015

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Plasticity driven growth of nanovoids and strength of aluminum at high rate tension: molecular dynamics simulations and continuum modeling
