ABSIM - Modular Simulation of Advanced Absorption Systems:
Recent Software Enhancements

Yigal Evron , Khaled Gommed , Gershon Grossman

PII: S0140-7007(18)30217-2
DOI: [10.1016/j.ijrefrig.2018.06.011](https://doi.org/10.1016/j.ijrefrig.2018.06.011)
Reference: IJIR 4020

To appear in: *International Journal of Refrigeration*

Received date: 18 October 2017
Revised date: 29 May 2018
Accepted date: 17 June 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- Improvements to the ABSIM software code were implemented and demonstrated.
- Improvements include an algorithm to automate the initial guess selection for the solver.
- The algorithm improves reliability and reduces manual user work.
- The algorithm made possible the implementation of a genetic global optimization feature.
