

## Accepted Manuscript

R1233zd(E) Flow Boiling inside a 4.3 mm ID Microfin Tube

Giulia RIGHETTI , Giovanni A. LONGO , Claudio ZILIO ,  
Ryo AKASAKA , Simone MANCIN

PII: S0140-7007(18)30126-9  
DOI: [10.1016/j.ijrefrig.2018.04.020](https://doi.org/10.1016/j.ijrefrig.2018.04.020)  
Reference: IJIR 3960

To appear in: *International Journal of Refrigeration*

Received date: 20 January 2018  
Revised date: 23 April 2018  
Accepted date: 25 April 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Highlights**

- R1233zd(E) was tested during flow boiling inside a mini microfin tube
- Heat transfer coefficients and pressure drops were experimentally collected and discussed
- The influence of thermophysical properties on some literature models was investigated
