This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Highlights**

- The state-of-art strategies of electric vehicle range extension are reviewed.
- Climate control load reduction methods are reviewed based on load characters.
- Different types of vehicle heat pump systems are introduced and compared.
