Design and analysis of multi-scale annular fins attached to a pin fin

Mohammad Reza Hajmohammadi

PII: S0140-7007(17)30486-3  
DOI: [10.1016/j.ijrefrig.2017.11.032](https://doi.org/10.1016/j.ijrefrig.2017.11.032)  
Reference: JIJR 3839

To appear in: *International Journal of Refrigeration*

Received date: 3 August 2017  
Revised date: 6 November 2017  
Accepted date: 25 November 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Highlights**

- Optimal design of annular pins connected to a pin fin is presented.
- A big picture of how the configuration is evolved to perform better, is provided.
- Increasing the degrees of freedom, remarkable enhances the thermal performance.
