Theoretical research and optimization analysis for the injection process of the single screw refrigeration compressor

Zengli Wang , Yingfeng shen , Zhenbo Wang , Jun Wang ,  
Wenchun Jiang , Qiang Li

PII: S0140-7007(17)30501-7  
DOI: [10.1016/j.ijrefrig.2017.12.003](https://doi.org/10.1016/j.ijrefrig.2017.12.003)  
Reference: IJIR 3845

To appear in: *International Journal of Refrigeration*

Received date: 27 July 2016  
Revised date: 29 November 2017  
Accepted date: 4 December 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

## Highlights

- Theoretical models of SSRC with injection have been established.
- The actual capacity and injection quality of the SSRC can be obtained.
- Influences of the structural parameters on the SSRC with injection are analyzed.
- Smaller the initial position and larger diameter of the injection hole need to be chosen.
