Surface tension of refrigerant mixtures: Integral equation method

R. Khordad

PII: S0140-7007(17)30481-4
DOI: [10.1016/j.ijrefrig.2017.11.027](https://doi.org/10.1016/j.ijrefrig.2017.11.027)
Reference: IJIR 3834

To appear in: *International Journal of Refrigeration*

Received date: 6 September 2017
Revised date: 14 November 2017
Accepted date: 25 November 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- The Ornstein-Zernike equation using the hypernetted chain approximation is solved.
- The radial distribution function is obtained numerically for the Stockmayer potential.
- The Surface tension is calculated for several refrigerant mixtures.
- Obtained results are in fairly good agreement with experimental data.
