Transient Model of an RSW System with CO₂ Refrigeration – A Study of Overall Performance

Eivind Brodal , Steve Jackson , Oddmar Eiksund

PII: S0140-7007(17)30443-7
DOI: [10.1016/j.ijrefrig.2017.11.002](https://doi.org/10.1016/j.ijrefrig.2017.11.002)
Reference: IJIR 3809

To appear in: *International Journal of Refrigeration*

Received date: 17 August 2017
Revised date: 1 November 2017
Accepted date: 2 November 2017

Please cite this article as: Eivind Brodal , Steve Jackson , Oddmar Eiksund , Transient Model of an RSW System with CO₂ Refrigeration – A Study of Overall Performance, *International Journal of Refrigeration* (2017), doi: [10.1016/j.ijrefrig.2017.11.002](https://doi.org/10.1016/j.ijrefrig.2017.11.002)

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- Thermodynamics based analysis of CO₂-refrigeration in RSW units
- Assessment of ambient temperature impact on performance parameters
- Modelling of realistic operating parameter for RSW units on board fishery vessels
- Detailed exchanger performance modelling instead of fixed temperature approaches
