Title: Experimental investigation of a novel expansion device control mechanism: vortex control of initially subcooled flashing r134a flow expanded through convergent-divergent nozzles

Author: Jingwei Zhu, Stefan Elbel

PII: S0140-7007(17)30379-1

DOI: <https://doi.org/doi:10.1016/j.ijrefrig.2017.09.023>

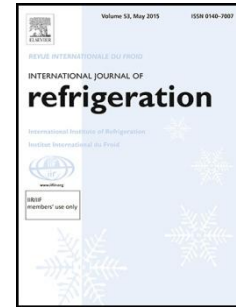

Reference: IJR 3763

To appear in: *International Journal of Refrigeration*

Received date: 15-6-2017

Revised date: 4-9-2017

Accepted date: 26-9-2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Experimental Investigation of a Novel Expansion Device Control
Mechanism: Vortex Control of Initially Subcooled Flashing R134a
Flow Expanded through Convergent-Divergent Nozzles**
