Title: Gaseous Isostatic Forging: Design and Application to Powder Metallurgy Ti-6Al-4V

Authors: Matthew K. Dunstan, James D. Paramore, Z. Zak Fang

PII: S0924-0136(18)30186-9
DOI: <https://doi.org/10.1016/j.jmatprotec.2018.04.039>
Reference: PROTEC 15739

To appear in: *Journal of Materials Processing Technology*

Received date: 17-1-2018
Revised date: 22-4-2018
Accepted date: 24-4-2018

Please cite this article as: Dunstan MK, Paramore JD, Fang ZZ, Gaseous Isostatic Forging: Design and Application to Powder Metallurgy Ti-6Al-4V, *Journal of Materials Processing Tech.* (2010), <https://doi.org/10.1016/j.jmatprotec.2018.04.039>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Gaseous Isostatic Forging: Design and Application to Powder Metallurgy Ti-6Al-4V
