Title: Study on AA5182 aluminum sheet formability using combined quasi-static-dynamic tensile processes

Authors: Guangyao Li, Huakun Deng, Yunfei Mao, Xu Zhang, Junjia Cui

PII: S0924-0136(17)30629-5
DOI: <https://doi.org/10.1016/j.jmatprotec.2017.12.038>
Reference: PROTEC 15575

To appear in: *Journal of Materials Processing Technology*

Received date: 24-8-2017
Revised date: 16-11-2017
Accepted date: 29-12-2017

Please cite this article as: Li G, Deng H, Mao Y, Zhang X, Cui J, Study on AA5182 aluminum sheet formability using combined quasi-static-dynamic tensile processes, *Journal of Materials Processing Technology* (2010), <https://doi.org/10.1016/j.jmatprotec.2017.12.038>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
