Elastic consequences of a single plastic event: towards a realistic account of structural disorder and shear wave propagation in models of flowing amorphous solids

Alexandre Nicolas, Francesco Puosi, Hideyuki Mizuno, Jean-Louis Barrat

PII: S0022-5096(15)00054-X
DOI: <http://dx.doi.org/10.1016/j.jmps.2015.02.017>
Reference: MPS2611

To appear in: *Journal of the Mechanics and Physics of Solids*

Received date: 12 September 2014
Revised date: 17 February 2015
Accepted date: 25 February 2015

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting galley proof before it is published in its final citable form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Elastic consequences of a single plastic event: towards
