

## Accepted Manuscript

Title: Phononic Layered Composites for Stress-wave Attenuation

Author: S. Nemat-Nasser H. Sadeghi A.V. Amirkhizi A. Srivastava

PII: S0093-6413(15)00088-9  
DOI: <http://dx.doi.org/doi:10.1016/j.mechrescom.2015.05.001>  
Reference: MRC 2961

To appear in:

Received date: 18-11-2014  
Revised date: 17-3-2015  
Accepted date: 4-5-2015

Please cite this article as: Nemat-Nasser, S., Sadeghi, H., Amirkhizi, A.V., Srivastava, A., Phononic Layered Composites for Stress-wave Attenuation, *Mechanics Research Communications* (2015), <http://dx.doi.org/10.1016/j.mechrescom.2015.05.001>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**1. Highlights**

- A design strategy is presented to develop layered composites with high attenuation coefficient and high in-plane stiffness
- Dynamic homogenization used
- The methodology is illustrated in terms of the specific example
- The results are experimentally verified
