Title: A non-contact calibration method for cutter runout with spindle speed dependent effect and analysis of its influence on milling process

Authors: Xing Zhang, Jun Zhang, Wei Zhang, Jianhui Li, Wanhua Zhao

PII: S0141-6359(17)30142-3
DOI: <http://dx.doi.org/10.1016/j.precisioneng.2017.08.020>
Reference: PRE 6649

To appear in: *Precision Engineering*

Received date: 6-3-2017
Revised date: 6-8-2017
Accepted date: 21-8-2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

A non-contact calibration method for cutter runout with spindle speed dependent effect and analysis of its influence on milling process

Xing Zhang; Jun Zhang; Wei Zhang; Jianhui Li; Wanhua Zhao*
