Towards analysing risks to public safety from wind turbines

Sander R. Brouwer , Saad H.S. Al-Jibouri ,
Ibsen Chivatá Cárdenas , Johannes I.M. Halman

PII: S0951-8320(16)30769-4
DOI: [10.1016/j.res.2018.07.010](https://doi.org/10.1016/j.res.2018.07.010)
Reference: RESS 6209

To appear in: *Reliability Engineering and System Safety*

Received date: 7 November 2016
Revised date: 6 July 2018
Accepted date: 6 July 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- Wind turbines failures
- Public safety risks
- Fault Tree Analysis (FTA) of Wind Turbines
- Quantification of component failures
- Improvement assessment procedure
