This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- The paper presents a new type of conceptual framing for System 1 – System 2 thinking in risk science
- It outlines a method for how to better incorporate System 1 type of thinking in risk assessments and management
- Perspectives on risk highlighting uncertainties instead of probabilities are used as a basis for the discussion
