Entering Data Correctly: An Empirical Evaluation of the Theory of Planned Behaviour in the Context of Manual Data Acquisition

Tom Haegemans, Monique Snoeck, Wilfried Lemahieu

PII: S0951-8320(17)31297-8
DOI: [10.1016/j.res.2018.05.009](https://doi.org/10.1016/j.res.2018.05.009)
Reference: RESS 6160

To appear in: *Reliability Engineering and System Safety*

Received date: 6 November 2017
Revised date: 11 May 2018
Accepted date: 18 May 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- The theory of planned behaviour is tested in the context of data entry
- Two seldomly measured constructs are included: behavioural control and behaviour
- Behavioural control had a stronger correlation with behaviour than intention
- Instrumental attitude had the strongest correlation with intention
