Bayesian Analysis of Two-Phase Degradation Data Based on  
Change-Point Wiener Process

Pingping Wang, Yincai Tang, Suk Joo Bae, Yong He

PII: S0951-8320(17)30265-X  
DOI: [10.1016/j.ress.2017.09.027](https://doi.org/10.1016/j.ress.2017.09.027)  
Reference: RESS 5965

To appear in: *Reliability Engineering and System Safety*

Received date: 5 March 2017  
Revised date: 16 August 2017  
Accepted date: 30 September 2017

Please cite this article as: Pingping Wang, Yincai Tang, Suk Joo Bae, Yong He, Bayesian Analysis of Two-Phase Degradation Data Based on Change-Point Wiener Process, *Reliability Engineering and System Safety* (2017), doi: [10.1016/j.ress.2017.09.027](https://doi.org/10.1016/j.ress.2017.09.027)

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Highlights**

- Proposed change-point Wiener process model better fit to the two-phase degradation data than other models;
- Better performance of hierarchical Bayesian method than maximum likelihood approach;
- Good behavior of the method and model in OLED data fitting and prediction.
