

Author's Accepted Manuscript

The effects of urea and caprolactam on the molecular mechanisms and elastic modulus of Polyvinyl alcohol (PVA): a molecular dynamics simulation study

Fei Ni, Guangchun Wang, Haibin Zhao

PII: S1751-6161(18)30223-6
DOI: <https://doi.org/10.1016/j.jmbbm.2018.06.043>
Reference: JMBBM2864

To appear in: *Journal of the Mechanical Behavior of Biomedical Materials*

Received date: 23 February 2018
Revised date: 12 May 2018
Accepted date: 26 June 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting galley proof before it is published in its final citable form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

The effects of urea and caprolactam on the molecular mechanisms and elastic modulus of Polyvinyl alcohol (PVA): a molecular dynamics simulation study
