

Author's Accepted Manuscript

Influence of gamma and electron beam sterilization on the stability of a premixed injectable calcium phosphate cement for trauma indications

Kieran A. Murray, Maurice N. Collins, Regina P. O'Sullivan, Guang Ren, Declan M. Devine, Alan Murphy, Jarosław Sadło, Carol O'Sullivan, Brian McEvoy, Olivier Vrain, Cathriona O'Neill, Gerard Insley

PII: S1751-6161(17)30389-2
DOI: <http://dx.doi.org/10.1016/j.jmbbm.2017.09.002>
Reference: JMBBM2486

To appear in: *Journal of the Mechanical Behavior of Biomedical Materials*

Received date: 19 July 2017
Revised date: 31 August 2017
Accepted date: 3 September 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting galley proof before it is published in its final citable form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Influence of gamma and electron beam sterilization on the stability of a premixed injectable calcium phosphate cement for trauma indications
