

## Author's Accepted Manuscript

Contact fatigue of human enamel: experiments, mechanisms and modeling

S.S. Gao, B.B. An, M. Yahyazadehfar, D. Zhang, D.D. Arola

PII: S1751-6161(16)30003-0  
DOI: <http://dx.doi.org/10.1016/j.jmbbm.2016.02.030>  
Reference: JMBBM1827

To appear in: *Journal of the Mechanical Behavior of Biomedical Materials*

Received date: 6 November 2015  
Revised date: 4 February 2016  
Accepted date: 23 February 2016

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting galley proof before it is published in its final citable form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain

# CONTACT FATIGUE OF HUMAN ENAMEL: EXPERIMENTS, MECHANISMS AND MODELING

S.S. Gao<sup>1</sup>, B.B. An<sup>2,3</sup>, M. Yahyazadehfar<sup>4</sup>, D. Zhang<sup>3</sup> and D.D. Arola<sup>4,5,▲</sup>

<sup>1</sup>State Key Laboratory of Oral Diseases, West China Hospital of Stomatology, Sichuan University, Chengdu, People's Republic of China

<sup>2</sup>Department of Physics, Shanghai University, Shanghai, PR China

<sup>3</sup>Department of Mechanics, Shanghai University, Shanghai, PR China

<sup>4</sup>Department of Materials Science and Engineering, University of Washington  
Seattle, WA USA

<sup>5</sup>Department of Restorative Dentistry, Dental School, University of Washington  
Seattle, WA USA

Submitted to: Journal of the Mechanical Behavior of Biomedical Materials

Short Title: Contact Fatigue of Enamel

---

Support for the following investigation was provided in part by the National Natural Science Foundation of China (No: 81100777).
