

Author's Accepted Manuscript

Impact of surface porosity and topography on the mechanical behavior of high strength biomedical polymers

Nathan T. Evans, Cameron W. Irvin, David L. Safranski, Ken Gall

PII: S1751-6161(16)30006-6
DOI: <http://dx.doi.org/10.1016/j.jmbbm.2016.02.033>
Reference: JMBBM1830

To appear in: *Journal of the Mechanical Behavior of Biomedical Materials*

Received date: 27 January 2016
Revised date: 24 February 2016
Accepted date: 25 February 2016

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting galley proof before it is published in its final citable form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Impact of surface porosity and topography on the mechanical behavior of high strength biomedical polymers
