

## Author's Accepted Manuscript

Influence of the overall stiffness of a load-bearing porous titanium implant on bone ingrowth in critical-size mandibular bone defects in sheep

T. Schouman, M. Schmitt, C. Adam, G. Dubois, P. Rouch

PII: S1751-6161(16)30009-1  
DOI: <http://dx.doi.org/10.1016/j.jmbbm.2016.02.036>  
Reference: JMBBM1833

To appear in: *Journal of the Mechanical Behavior of Biomedical Materials*

Received date: 26 November 2015  
Revised date: 21 February 2016  
Accepted date: 28 February 2016

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting galley proof before it is published in its final citable form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
