Hybridisation of man-made cellulose and glass reinforcement in short-fibre composites for injection moulding – Effects on mechanical performance

P. Franciszczak, K. Kalniņš, A.K. Błędzki

PII: S1359-8368(18)30202-6

DOI: [10.1016/j.compositesb.2018.03.008](https://doi.org/10.1016/j.compositesb.2018.03.008)

Reference: JCOMB 5567

To appear in: *Composites Part B*

Received Date: 17 January 2018

Revised Date: 27 February 2018

Accepted Date: 3 March 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Hybridisation of man-made cellulose and glass reinforcement in short-fibre composites for injection moulding –  
effects on mechanical performance**
