Effects of exfoliated graphite on the thermal properties of erythritol-based composites used as phase-change materials

Hye Kyoung Shin, Kyong-Yop Rhee, Soo-Jin Park

PII: \$1359-8368(16)30281-5

DOI: 10.1016/j.compositesb.2016.04.033

Reference: JCOMB 4231

To appear in: Composites Part B

Received Date: 15 December 2015

Revised Date: 29 March 2016

Accepted Date: 7 April 2016

Please cite this article as: Shin HK, Rhee K-Y, Park S-J, Effects of exfoliated graphite on the thermal properties of erythritol-based composites used as phase-change materials, *Composites Part B* (2016), doi: 10.1016/j.compositesb.2016.04.033.

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
