Sustainable packaging biocomposites from pPolylactic acid and wheat straw:
Enhanced physical performance by solid state shear milling process

Shuangqiao Yang, Shibing Bai, Qi Wang

PII: S0266-3538(17)31032-1

DOI: [10.1016/j.compscitech.2017.12.026](https://doi.org/10.1016/j.compscitech.2017.12.026)

Reference: CSTE 7014

To appear in: *Composites Science and Technology*

Received Date: 28 April 2017

Revised Date: 17 November 2017

Accepted Date: 23 December 2017

Please cite this article as: Yang S, Bai S, Wang Q, Sustainable packaging biocomposites from pPolylactic acid and wheat straw: Enhanced physical performance by solid state shear milling process, *Composites Science and Technology* (2018), doi: 10.1016/j.compscitech.2017.12.026.

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

1 **Sustainable Packaging Biocomposites from Polylactic acid and Wheat Straw:**
2 **Enhanced Physical Performance by Solid State Shear Milling Process**

3 Shuangqiao Yang, Shibing Bai*, Qi Wang
