Enhanced Electrical Conductivity, Mechanical Modulus, and Thermal Stability of Immiscible Poly(lactide)/Polypropylene Blends by the Selective Localization of Multi-walled Carbon Nanotubes

Tae-Won Lee, Young Gyu Jeong

PII: S0266-3538(14)00300-5

DOI: <http://dx.doi.org/10.1016/j.compscitech.2014.08.019>

Reference: CSTE 5915

To appear in: *Composites Science and Technology*

Received Date: 22 February 2014

Revised Date: 22 May 2014

Accepted Date: 14 August 2014

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Enhanced Electrical Conductivity, Mechanical Modulus, and Thermal Stability of Immiscible Polylactide/Polypropylene Blends by the Selective Localization of Multi-walled Carbon Nanotubes

Tae-Won Lee and Young Gyu Jeong*
