RF–MEMS for High–Performance and Widely Reconfigurable Passive Components – A Review With Focus on Future Telecommunications, Internet of Things (IoT) and 5G Applications

Jacopo Iannacci

PII: S1018-3647(17)30400-7

DOI: <http://dx.doi.org/10.1016/j.jksus.2017.06.011>

Reference: JKUS 498

To appear in: *Journal of King Saud University - Science*

Received Date: 18 April 2017

Accepted Date: 28 June 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**RF-MEMS for High-Performance and Widely Reconfigurable Passive
Components – A Review With Focus on Future Telecommunications,
Internet of Things (IoT) and 5G Applications**
